## Letter of Solidarity

SAUSA unequivocally condemns the shocking and horrifying arson attack on Global Aktion's headquarter in Copenhagen, Denmark. This is seen as a deliberate act of violence inflicted on the pro-Saharawi NGO's and supporters. SAUSA considers this coward act as an act of terrorism against the people of Denmark, against the Danish NGO's and against the Polisario representation in Denmark. Our hearts are with those who lost all their belongings and their place of work and now fear for their lives.

SAUSA strongly believes that Danish authorities' response must consider that both Danish lives and Saharawi lives are at stake here and are victims of this heinous attack. This is clear evidence that occupation can extend overseas, and its campaign has no limit. We hope that this is another proof that the Saharawi cause is a just cause and that terror against people of Western Sahara is not just limited to the occupied territory, but it follows them everywhere.

SAUSA calls upon the Danish government to take the following action:

1. Publicly discourage and condemn any hate crimes and backlash against any Saharawi or any pro-Saharawi including the Danish activists and the NGO's working for the Saharawi cause.
- 2- Ensure that supplemental funding requests for Pro-Saharawi NGO's include humanitarian assistance to repair the damage cause by arson.
- 3- To provide protection for all NGO's staff and the Polisario representation.

We must stand in solidarity with all victims of violence and terrorism. We must do everything we can to prevent such acts of violence and terror based on hatred, prejudice, and ignorance.

SAUSA.
